## CREEDS OF GREAT BUSINESS MEN

1. The first of these is the fact that the  
 2. 1840s were a period of rapid growth  
 3. in the number of people living in the  
 4. United States. The population grew from  
 5. about 12 million in 1800 to over 20  
 6. million by 1840. This growth was  
 7. due to a number of factors, including  
 8. immigration from Europe and the  
 9. birth of new Americans. The growth  
 10. was particularly rapid in the Northeast  
 11. and the Midwest. The growth was also  
 12. uneven, with some areas growing much  
 13. faster than others. The growth was  
 14. also uneven in terms of the types of  
 15. people who were moving to the United  
 16. States. Some were immigrants from  
 17. Europe, while others were born in the  
 18. United States. The growth was also  
 19. uneven in terms of the types of  
 20. land that was being settled. Some areas  
 21. were being settled by farmers, while  
 22. others were being settled by miners.  
 23. The growth was also uneven in terms  
 24. of the types of industries that were  
 25. developing. Some areas were becoming  
 26. industrialized, while others were  
 27. remaining agricultural. The growth  
 28. was also uneven in terms of the  
 29. types of people who were working in  
 30. the different industries. Some were  
 31. immigrants, while others were born in  
 32. the United States. The growth was  
 33. also uneven in terms of the types of  
 34. land that was being settled. Some  
 35. areas were being settled by farmers,
